

ZeroHash

SOLUTION BRIEF

ACH BANK TRANSFERS

Convert more customers with ACH bank transfers

An all-in-one fiat and crypto solution
embedded into your platform

Benefits of Zero Hash all-in-one solution

Higher conversion

Enable customers to on-ramp seamlessly through ACH deposits for future trades or ACH payments to buy crypto directly

Frictionless experience

Enable customers to off-ramp quickly and easily with instant crypto to fiat conversion and ACH withdrawals

Reduced fraud

Stay compliant with built-in balance checks and transaction monitoring (on-chain)

Single API integration for fiat and crypto

Maintain a single integration for end-to-end fiat to crypto capabilities

API for end-to-end fiat and crypto flows

You manage your customer experience. Let Zero Hash manage ACH transactions.

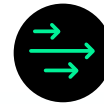

A smooth and secure payment process

Customer payment details are tokenized and shared seamlessly and securely between Zero Hash and Plaid, so you don't have to store sensitive data

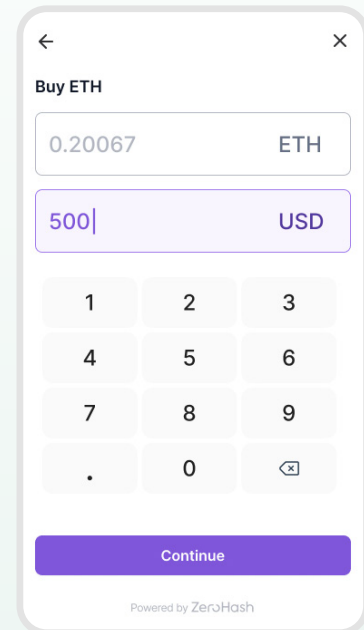

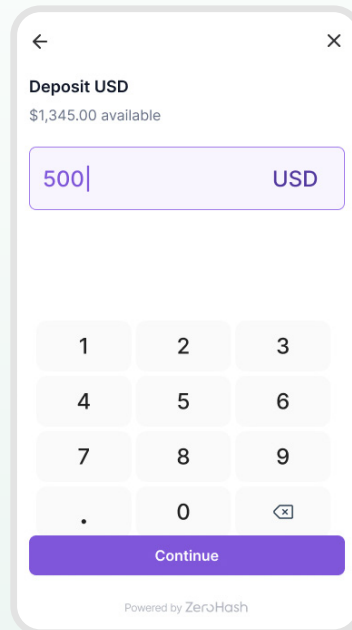

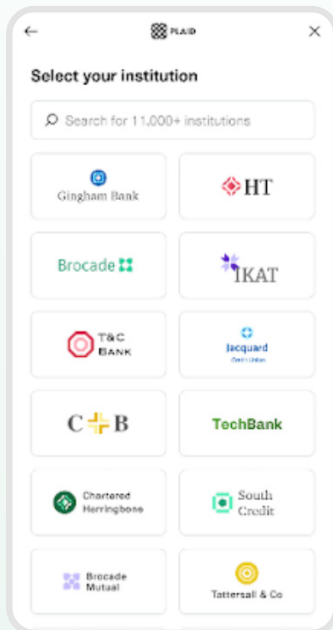

Reduce friction with trusted and secure bank linking

Enable customers to link their bank account through Plaid's widely recognized and trusted bank account linking

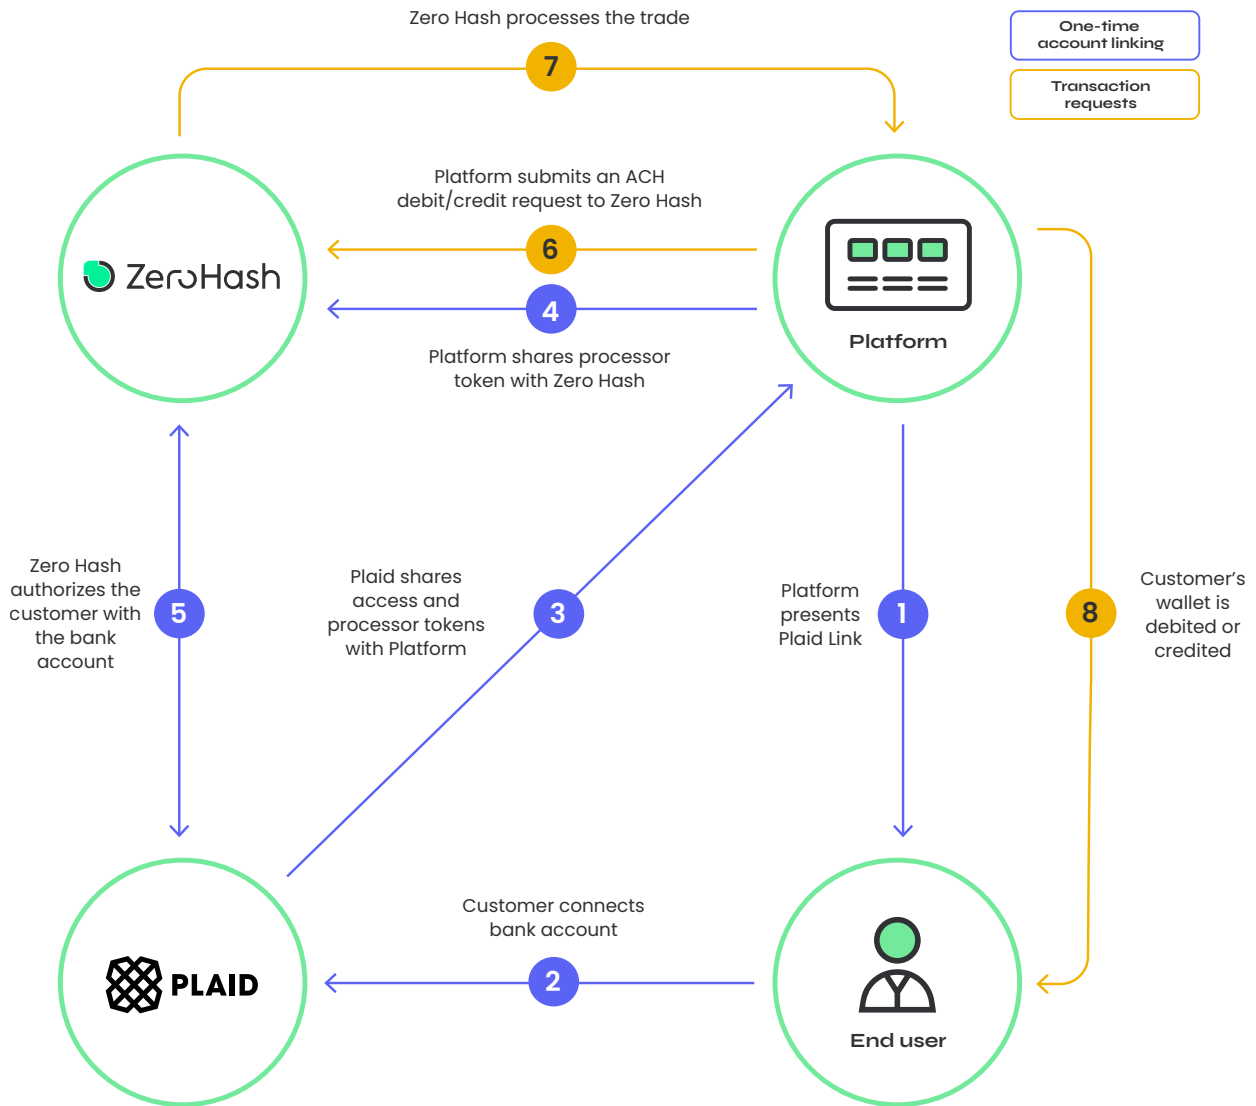

Fully managed money movement

Leverage Zero Hash's regulatory licensing to allow safe, secure, and compliant fiat and crypto money movement

The 4-Party on and off-ramp model

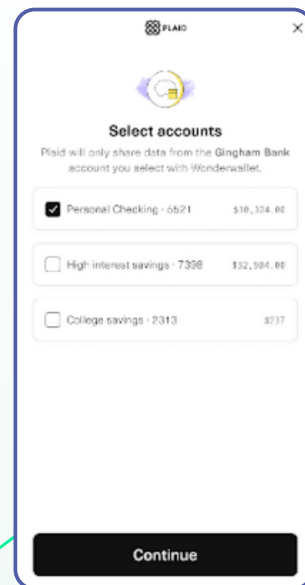

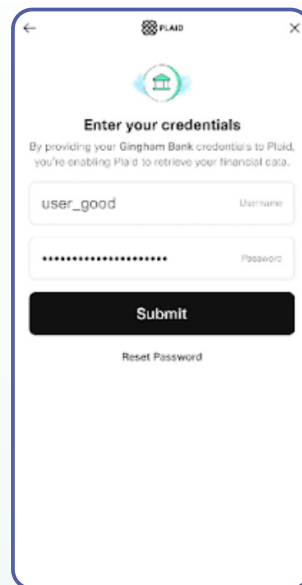

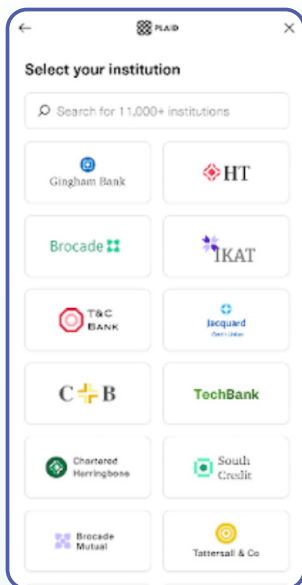

An end-to-end integration, delivers simple, fast and compliant movement of funds.

Pay by bank account

When customers select to pay by bank account, they can connect in three simple steps:

- 1 Pick their bank of choice
- 2 Enter their login credentials
- 3 Authenticate which account to connect

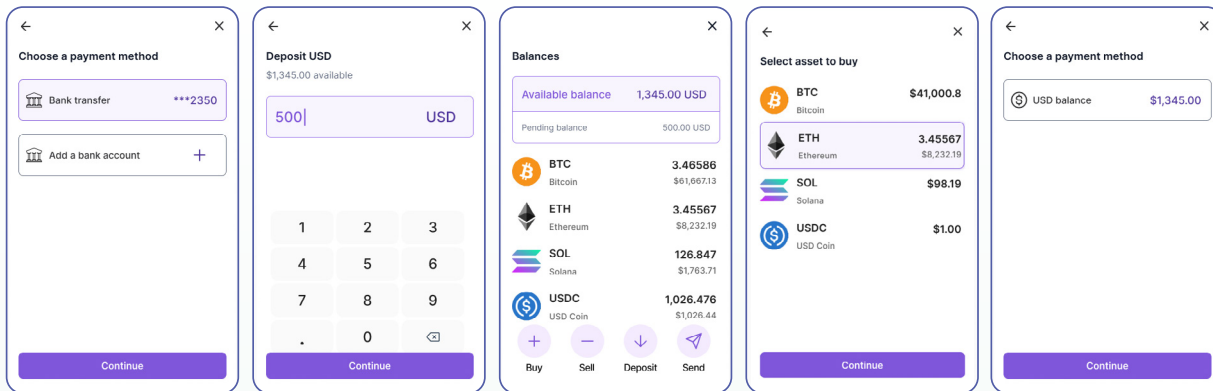

Payment models

Two payment options to meet your product needs:

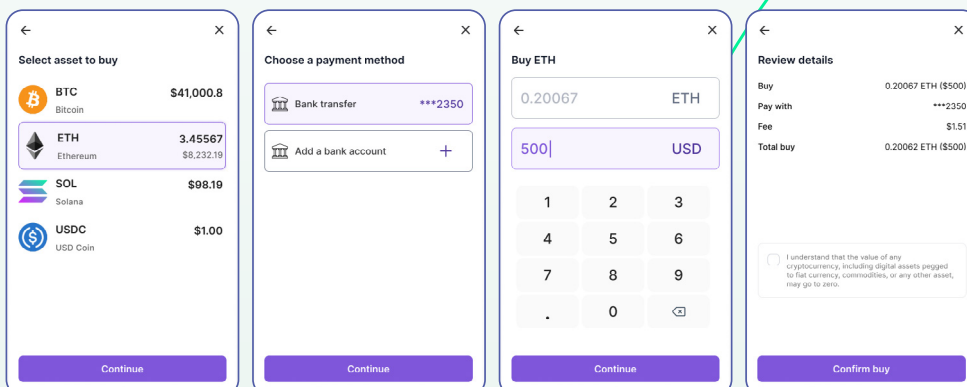

1 Deposit USD

- Customer can hold a USD balance that's usable whenever they want to buy crypto
- Customer can withdraw any amount of held USD directly to their bank account
- Low risk option that has potential for lower ACH fees given the customer doesn't need to determine the exact assets to acquire at time of deposit

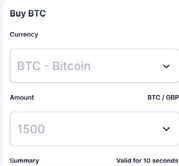

2 Buy Crypto with USD

- Customer can buy a specified and quoted amount of crypto directly from their bank account
- Customer can sell crypto for USD directly to their bank account
- Ideal option if customers hold crypto in a self-custodied wallet

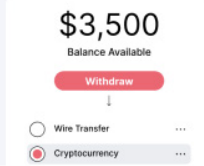

Seamlessly bridge fiat and crypto with scalable APIs

Our complete fiat and crypto toolkit is designed to make it easier for customers to interact and transact with your business

On and off ramps

Scale your platform by allowing customers to simply and quickly move from fiat-to-crypto and crypto-to-fiat. Instantly link US bank accounts for fast and compliant ACH payments

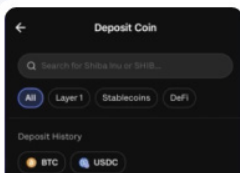

Crypto payroll
