

# ZeroHash

The background features a dark blue and black grid with various data visualization elements. There are several floating, tilted rectangular panels in shades of blue and green. One panel shows a line graph with a white line and a blue shaded area. Another panel shows a pie chart with a white and blue section. A third panel shows a bar chart with white bars. There are also several horizontal bars with blue and green segments, and a circular ring with a blue and green gradient.

SOLUTION BRIEF

CRYPTO MARKET DATA API

Embed real-time & historical **crypto market data** into your platform to drive customer engagement and transaction volume through interactive charting and data

## Key Benefits and Features

### Market coverage in one place

Deliver easily digestible and extensive market data, with 50+ digital assets and advanced category controls

### Advanced trading experience

Offer a simplified trading experience, with advanced capabilities. Add charting capabilities, asset logos and description

### Instant Alerts

Send push, text, or in app notifications, when prices move on users watchlists to keep your users engaged

### Fast & Reliable Data

Provide real-time and accurate price for asset tickers, delivered through low latency infrastructure

### Simple integration

Built for developers with REST API and developer-friendly languages: Javascript, Python

# Unlock 24/7/365 access to global crypto market data through a handful of API endpoints

## Historical "OHLCV" Data

Historical open, high, low, close, volume (OHLCV) for minute, hourly, and daily time frames

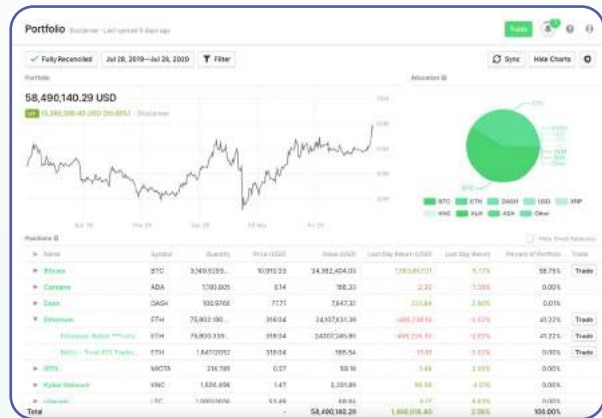

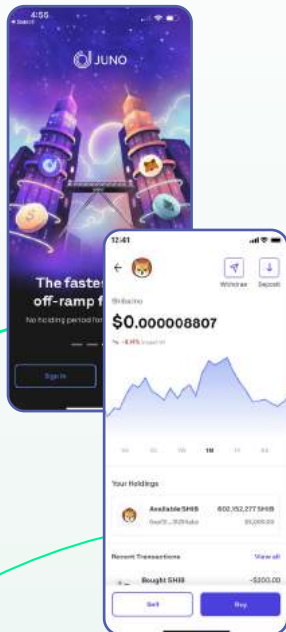

GET /market\_data/ohlcv

Basic or advanced data charts with full OHLCV data by specific assets

Detailed breakdown of pricing history by asset

### Symbol Data

Provide users with asset specific information, including market cap, 24 hour volume, and circulating supply

GET / market\_data/symbol\_data

Empower users to make insight-led decisions, with access to 50+ data points for each symbol

Enable users to create their own unique watchlists and create push notifications based on market events

## Coin and token Symbols

Passes the actual image URL approved by the token

GET / market\_data/image

Give users confidence they are viewing the correct token, with the most up to date symbol

## News

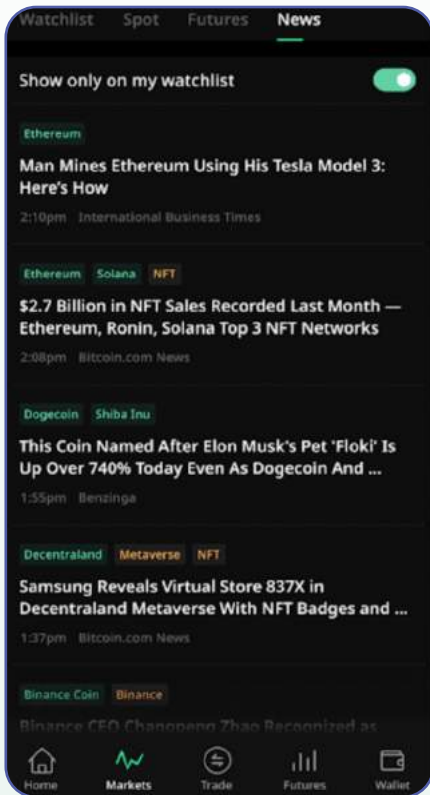

Deliver a list of available news articles from 70+ sources, including: Coin Desk, CNN and SeekingAlpha	GET / market_data/news/feeds
Deliver the latest news articles from all providers	GET / market_data/news/latest
Equip your users with a list of available news categories that they can filter by	GET / market_data/news/categories

Give your users the power of market knowledge in real-time, with 24/7/365 industry news

Offer users with access to in-depth and broad market data on specific coin and token symbols

Global innovators powered by Zero Hash

## Built for Developers

Integrate cryptocurrency market data instantly with a few lines of code

- ✓ Simple and Straightforward API
- ✓ Sandbox and Testing environments with live environment capabilities
- ✓ Dedicated Technical Support 24/7
